Unforgettable
Buffet Experience

TIGERCOMPANY®

Designing Elegance, Serving Innovation.

ABOUT OF

Designing Tiger products is a global affair that starts with our Italian designers and finishes with Korean dedication to quality. Tiger is a leading manufacturer of high quality buffet ware and multipurpose trolleys headquartered in S. Korea with production sites both in Seoul Korea and Tianjin China. With the new 20,000 sqm of factory and show room in Tianjin, Tiger can bring more innovative and value-added products to you. Our new 20,000 sqm factory will enable us to continue developing new innovations and value through quality. Tiger believes that the products that we offer to the customers should be:

- technologically advanced,
- elegantly designed,
- competitively priced.

We use the highest quality materials in the market today. We meet or exceed all European and American food safety standards. Tiger welcomes OEM/ODM as well.

The company motto is "no compromise in quality". Best hoteliers value our quality (complete reference list on www.tigerhotel.co.kr).

Tiger made history in the early 1980s when Mr. M. Y. Chang, Chairman of Tiger, founded Daijin Enterprise to manufacture service trolleys in a small workshop in South Korea. As a young man, he saw the growing op-

portunity in hospitality industry in Korea with Seoul Olympics games held in 1988. Daijin's modern service trolleys were quickly sought after restaurants and hotels. Growing from this heritage, Tiger was founded in 1996 and began to export. The synergy of old world craftsmanship from its Mother Company and innovation made Tiger to become an industry leader in just a few short years.

Tiger built a factory in Tianjin China in order to explore the growing Chinese market and to mass-produce products in 2001 and in 10 years it was expanded to 20,000 sqm of factory, warehouse, show room and office.

To ensure that quality is maintained, Mr. Chang-chairman, appointed his son to oversee the manufacturing.

With the opening of a design centre in Italy in 2005, making Tiger products became a truly global affair. Italian designers work with Korean engineers and the projects are realized as products in the newest and modern Chinese production.

Tiger's vision for the future is to bring value through quality in a larger range of table top product to become a reliable partner for the best hotels worldwide.

Buffet presentation

FUNCTIONAL BEAUTY

The Tiger Buffet Presentation Collection offers a comprehensive range of buffet risers, fruit stands, pastry stands, petit fours stands, muffin stands, and accessories—perfect for creating a functional yet sophisticated buffet.

The T-Collection features a versatile set of risers available in GN1/1, GN1/2, and GN2/4 sizes, each with three different height options. These risers can be paired with GN pans or Tiger wooden boxes, finished in exquisite ash wood. For added flexibility, tilted risers are also available, allowing for creative and dynamic presentations. Choose between black powder-coated or bronze PVD finishes to best match your aesthetic.

Tiger wooden boxes are ideal for displaying baked goods such as bread, croissants, Danish pastries, and other bakery products. They can also be equipped with refrigerating pads, making them suitable for presenting cheese, cold cuts, yogurt, and fruits. To ensure maximum hygiene, elegant dome covers are available for use with the buffet stands.

For those seeking the latest in buffet presentation, the Natural Collection stands out. Inspired by fruit crates, these stands are both elegant and sturdy, providing the perfect platform for showcasing your culinary creations. The range includes hot and cold displays, carving stations, hot and cold milk dispensers, coffee dispensers, and condiment dispensers.

With its exceptional quality and design, the Tiger Buffet Presentation Collection offers a wide array of options to meet the needs of professional caterers and those who love to entertain at home. It is the perfect choice for creating a memorable and refined buffet experience.

THE NATURAL SERIES

ORGANIC APPEAL

Designed to resemble a classic fruit box, The Natural Series brings an organic and authentic touch to buffet presentations. Its clean lines, wooden textures, and understated form evoke a sense of warmth and simplicity, recalling the beauty of natural materials and rural traditions. This design not only enhances the visual appeal of any setup but also creates an inviting and memorable dining atmosphere.

As one of the leading names in innovative buffet solutions and

multipurpose catering trolleys, Tiger introduces The Natural as a refined and versatile element for the modern hospitality world. Perfectly balancing rustic charm with contemporary sophistication, this series adapts seamlessly to both traditional and modern environments, offering style, functionality, and durability in every detail.

With The Natural, your buffet speaks a language of authenticity and quiet elegance.

BUFFET PRESENTATION

Smart Connectivity

Discreet magnets embedded in the corners ensure a tight and stable grip between units, allowing for modular setups that stay perfectly aligned, even during service.

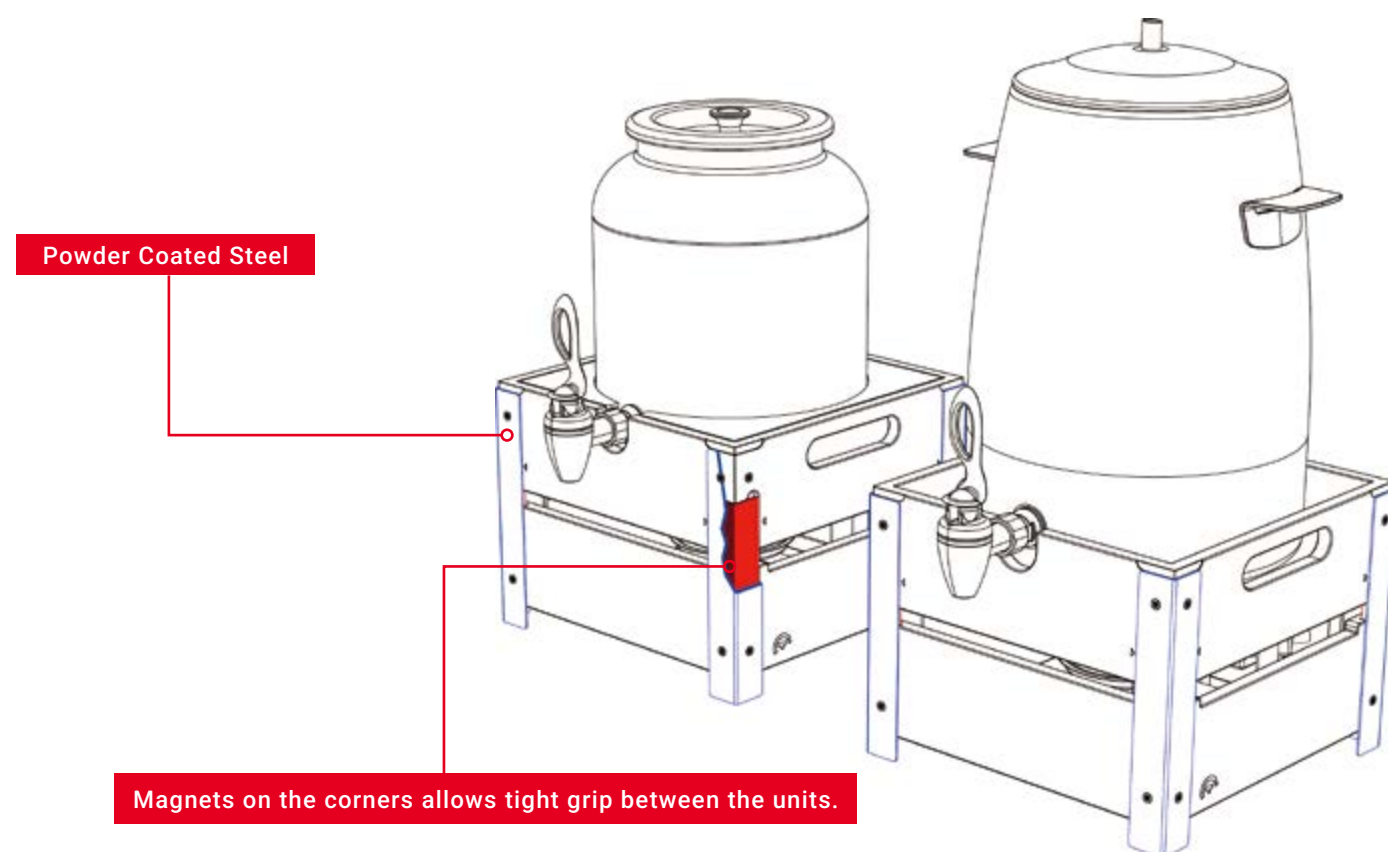

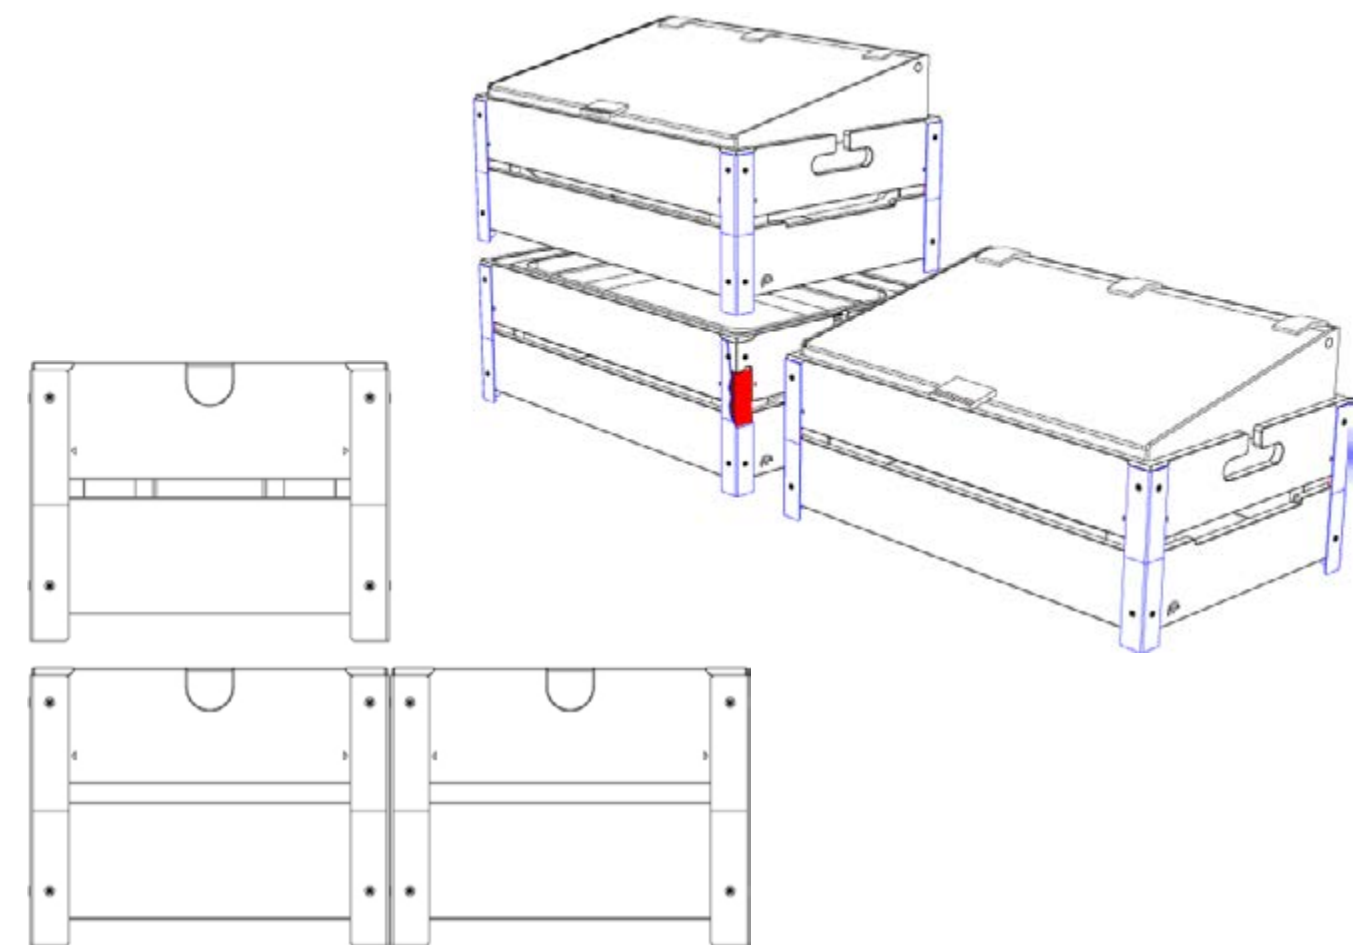

Durable Finish

Powder coated steel elements provide excellent resistance to scratches and corrosion, offering long-lasting durability while maintaining a sleek, contemporary look.

Natural Materials, Professional Performance

Ash wood brings warmth and rustic elegance with its natural grain and texture. Stainless steel 18/10 ensures strength, hygiene, and long-lasting performance in demanding environments. Porcelain inserts add a refined touch, ideal for direct food presentation. The collection is completed by elements in glass, silicone, and transparent acrylic, providing maximum visibility and versatile use across a wide range of buffet settings.

Risers

Elevated Display

The Riser is designed to enhance buffet and banquet presentations by elevating dishes for both visual appeal and guest convenience. Its clean, refined design allows it to be paired seamlessly with various product lines, including the T-Collection, while maintaining versatility across different settings.

Available in multiple heights, the risers can be nested together to maximize space efficiency and create dynamic, multi-level displays. When combined with a display dome cover, they ensure a more hygienic and elegant food presentation.

The Riser delivers both practicality and sophistication, making it an essential accessory for premium hospitality service.

Polar Heat System

SMART THERMAL TECHNOLOGY

The Polar Heat System is designed to create an excellent cooling environment for food that requires precise temperature control. Its thermal electric technology allows for both warm and cold use, consuming low energy (190W) and producing less noise than traditional compressor refrigerators. The unit maintains a cold temperature between 0°C and 10°C, and a warm temperature between 65°C and 85°C, although this may vary depending on the ingredients and quantity. Additionally, the Polar Heat System has a daisy-chaining

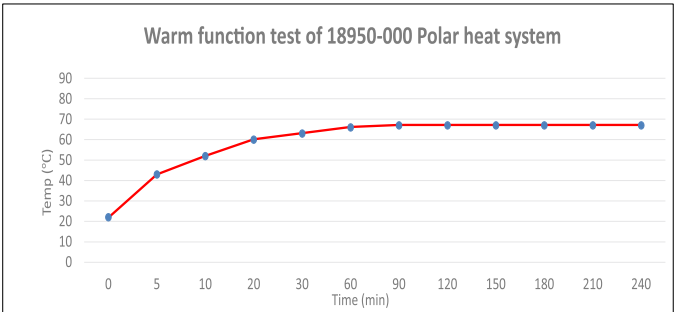

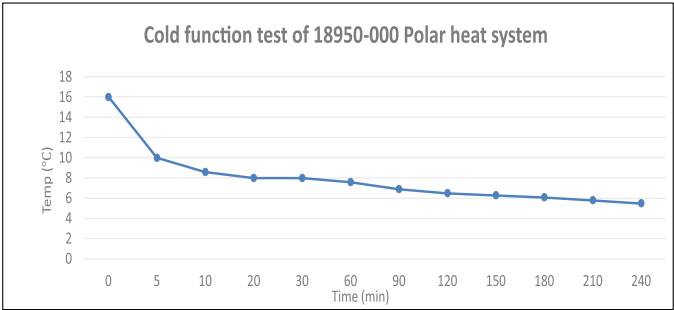

socket, which allows up to four units to be connected using a connecting cable. The LED light provides various lighting options to enhance food display, and Tiger offers related trays and accessories for optimal efficiency. We highly recommend using official products to maximize efficiency.

BUFFET PRESENTATION

Polar Heat System Function

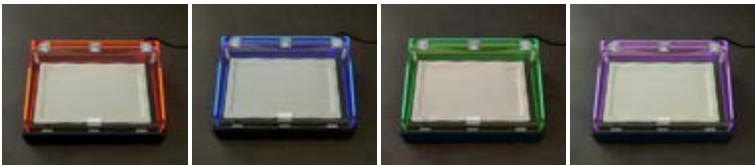

The system offers dual temperature modes, cooling from 0°C to 10°C or warming from 65°C to 85°C. This versatility ensures food is always served at the right temperature, whether fresh and chilled or hot and ready to enjoy.

18950 POLAR HEAT SYSTEM TEMP TEST

Applied multiple connection power sockets

The Polar Heat System features multiple connection sockets, allowing up to four units to run together with just one plug and a single power cord. It also comes with a changeable LED light color, offering flexible lighting options to enhance food presentation. This design minimizes cable clutter and makes installation simple and efficient.

Premium Sneeze Guard

Dual Adjustability

The Premium Sneeze Guard is engineered to provide unmatched flexibility for buffet and food service counters. With its dual adjustability, users can modify both the overall height of the unit and the angle of the shield, all without making changes to the existing counter structure. This ensures the guard can be adapted to different layouts and service styles with ease.

BUFFET PRESENTATION

Beyond functionality, it serves as a hygienic barrier that effectively prevents droplet contamination while preserving a clear view of the displayed food. The refined design adds a professional and premium touch to the service environment, making it an essential element for maintaining both safety and presentation standards in modern hospitality.

Bowls

Fresh & Elegant Display

Crafted to enhance both presentation and practicality, the bowls are designed to hold and showcase a wide variety of dishes elegantly way. Their refined form highlights the beauty of the food, while the option to fill the base with ice allows smaller plates and portions to be kept cool, fresh, and ready to serve. This makes them ideal for buffet settings where both visual appeal and food safety are essential.

Carving stations & Heating lamps

WARMTH WITH STYLE

For a modern and refined buffet, heat lamps are essential. They add sophistication and style while keeping breads, pizzas, and appetizers warm, or creating an eye-catching carving station. Our Tiger heat lamps combine elegance and function, available in single or double designs with a sleek stainless steel frame, adjustable neck, and a stylish shade in black powder-coated or vintage bronze PVD finish.

Tiger carving stations are offered in several models, each featuring a durable black high-temp food safe polyethylene surface with a built-in cavity to collect juices. All food-contact parts are dishwasher safe for easy cleaning. Functional, elegant, and stackable for convenient storage, our heat lamps and carving stations are the ideal choice for professionals who want to impress.

Our carving stations are also available in several versions, all featuring a durable black high-temp food safe polyethylene carving surface. And for easy cleaning, all parts that come into contact with food are dishwasher safe. A convenient cavity under the carving surface catches any juices, keeping your display area clean and tidy.

Not only are our carving stations functional and stylish, but they're also stackable, making storage a breeze. Whether you're a professional caterer or hosting a special event at your hotel or restaurant, our Tiger heat lamps and carving stations will elevate your buffet to the next level.

Modular buffet systems

ABOUT DOMINO

Introducing Domino – a revolutionary modular buffet system that offers complete flexibility for your food display needs. Whether you're hosting a large event or setting up a small buffet breakfast, Domino's components can interlock or stand alone to create a custom buffet that suits your needs. Made from durable 18/10 stainless steel, Domino is built to withstand the demands of commercial operations. The heated components can be operated with canned fuel or electric heaters.

The easy lock and unlock leg system allows you to adjust the height without the need for tools or complicated instructions. The base modules come in three sizes: 25 cm (9.75") square, 35 cm (13.75") square, and 62×35 cm (24.25" x 13.75") rectangle, with each unit standing 9 cm (3.50") tall. You can easily increase the height in 9 cm (3.50") increments to create stunning high and low horizon effects, and each leg can be inserted and twisted without the need for tools.

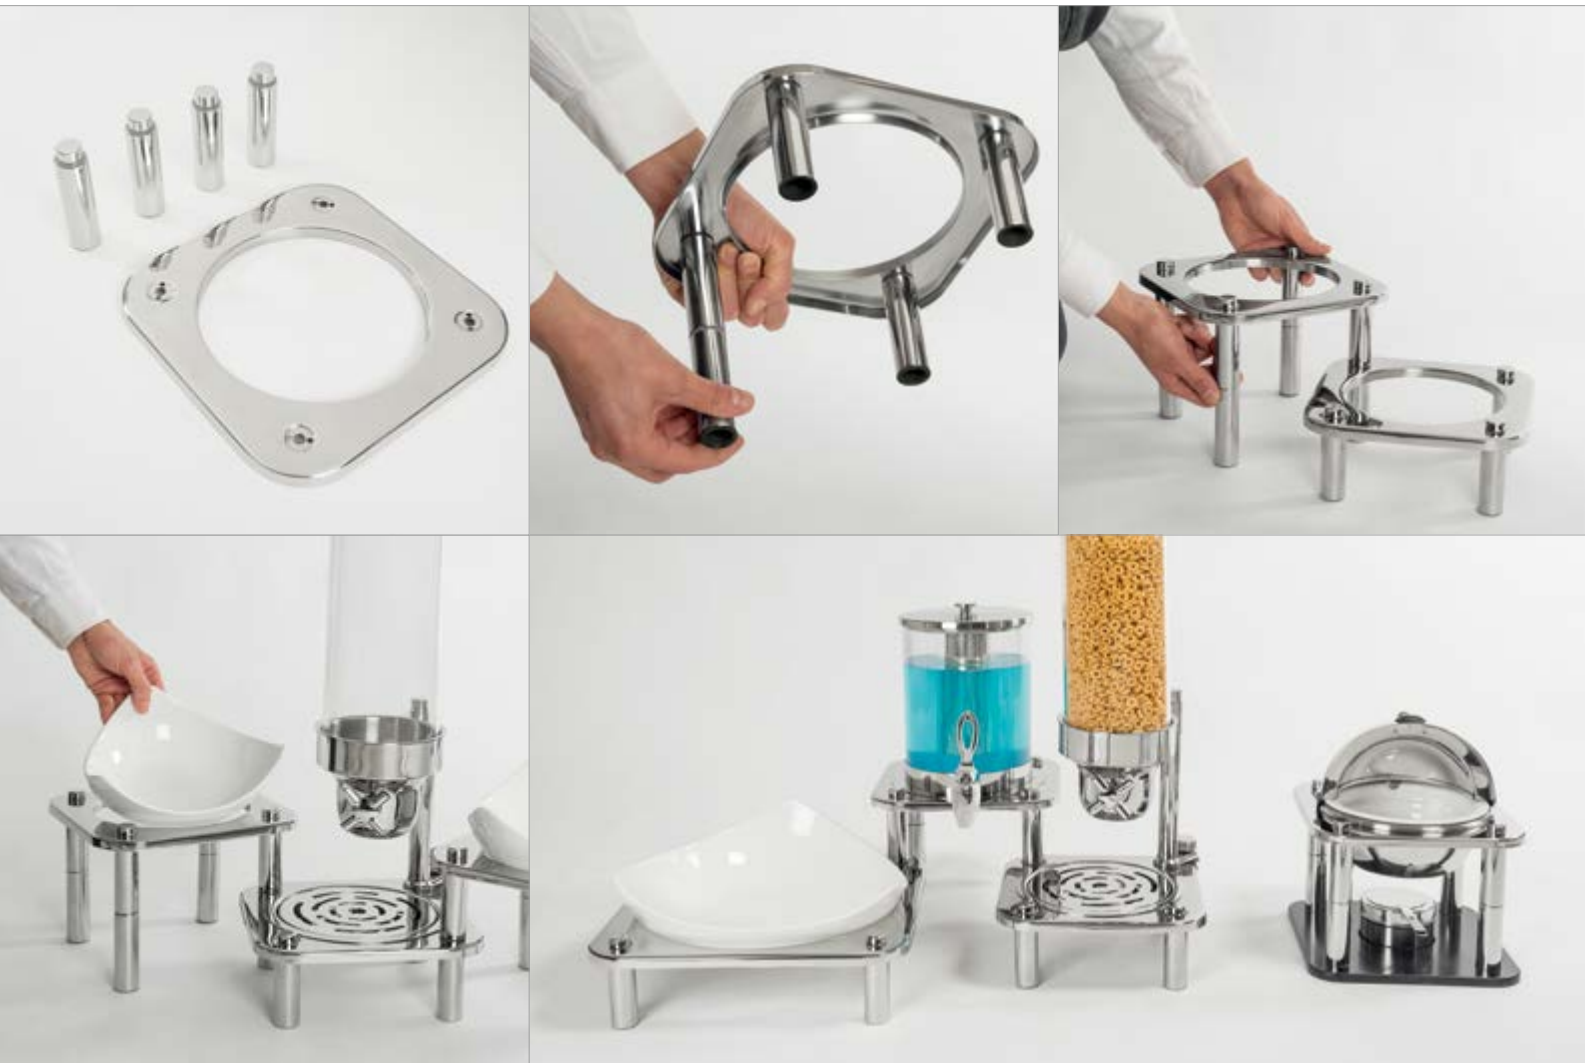

Domino's combination options are endless, including a domed cold display for cold cuts and cheese, salad bowls, juice dispensers, cereal dispensers, hot station, soup station, heat lamps, and induction chafing dishes. The system is incredibly easy to use, and you can change it up whenever you like to have every day a new presentation. With Domino, you can let your imagination run wild and create a buffet that's uniquely yours.

It's so simple to use that even a child can do it, making it a fun and exciting way to display your food. Domino has everything you need to make your buffet a success.

Induction chafing dishes

BUILT TO LAST

Tiger's line of induction chafing dishes is a testament to our commitment to providing superior performance and quality design. Our induction chafers not only boast an impressive appearance, but also offer unparalleled efficiency and durability. One of the standout features of Tiger induction chafers is the high density magnetic bottom, which converts over 98% of energy into heat, making them the most energy-efficient chafers on the market. Additionally, the clad bottom ensures even heat distribution, minimizing hot spots that can cause food to stick and burn.

What sets our induction chafers apart is their repairability. We guarantee the availability of parts and components for 15 years, so you can be confident that this is a quality investment that will last for years to come.

Our Smart and Smart W series chafers feature self-closing lids with patented hinges, while our T collection chafers are equipped with a patented free stop motion hinge that allows the lid to stop at any angle. The lids can also be removed with one hand for easy cleaning. Plus, air vents on the lids help to reduce condensation, which is captured by the water recycling system, resulting in less refilling of the water pan and decreased labor costs. The T collection chafers also feature panoramic glass lids, while the Smart and Smart W series are available with both solid and glass window lids. With Tiger's induction chafing dishes, you can be sure that you're investing in a product that not only looks great, but also delivers superior performance and durability.

Warm Gray,
Flexible Elegance

The newly introduced WARM GRAY finish moves beyond the conventional stainless steel look, bringing a softer, more refined presence to the buffet table. Its warm, muted tone creates a calm and welcoming atmosphere while maintaining a modern aesthetic.

Stands 11281-AWGR and 11282-AWGR can be used together with the chafing dish, or the chafing dish can be placed directly on an induction cooker for standalone use. This flexible configuration allows effortless adaptation to various service environments, from hotels and restaurants to professional catering settings.

All Black,
Timeless Modernity

The bold yet restrained ALL BLACK finish delivers a strong visual statement while preserving a clean, contemporary silhouette. Designed for refined buffet environments, it adds depth and sophistication without overwhelming the table setting.

Induction Hob

When using any of Tigers induction chafers and combining them with Tigers Induction heaters you will accomplish many good things: going green, use less energy, run more chafers on a single power circuit, possibly eliminate the need to re-wire the building. Induction heaters require induction ready pans and chafers.

Anti skid silicone pad for induction.

Roll top chafing dishes

EASY ROLL, ELEGANT DISPLAY

Tiger's Roll Top Chafing Dishes are crafted from solid 18-10 stainless steel, ensuring long-lasting durability and a stylish presentation for any event. The range includes oblong GN 1/1 chafers and round chafers in 2 sizes, offering flexibility in design and serving capacity.

The Euri and Odin collections feature classic designs with sturdy legs, available in both chrome and brass finishes, along with matching handles. Meanwhile, the IBIS and T collections offer a more modern and sleek look, and are designed to be stackable for easy storage.

1. Removable lid opens at 90° and 180° degrees for serving versatility.

2. Dripless Waterpan.

3. Fully functional automatic slow-down system.

All Tiger Roll Top Chafers boast a sturdy structure due to 3 mm gauge frames, providing reliability and strength for commercial use. The lid can be opened to 90° and 180° for versatile serving options, and features an auto-braking system to prevent slamming. The lid will roll back to 90° and stop, helping to keep food warm more efficiently. Additionally, the water control system recycles condensation from the lid to the water pan, reducing labor costs and making maintenance a breeze. The handle remains cool to prevent burns, and the chafers are fully repairable, ensuring a quality investment that will last for years to come.

Urns & Dispenser

SMART & HYGIENIC DISPENSING

The cereal dispenser is designed to dispense many different dry foods such as: nuts, goldfish, trail mix, candy, yogurt toppings and of course cereal. Simply turn the soft rubber paddle with the handle to dispense. There is a catch tray at the bottom for crumbs. It can be easily assembled and disassembled so it's simple to clean and repair. Replacement parts are readily available. This makes it a quality investment that will last for years to come.

Tiger cereal dispenser is made of 18-10 stainless steel with polycarbonate BPA-free cylinders, offering outstanding scratch resistance and no glazing. It is dishwasher safe, ensuring easy cleaning and long-term durability for commercial use.

Cereal dispensers are available in different designs: Odin ranges feature a sleek stainless steel base and are available with single, double, and triple containers, the triple being swivel type. The T collection version features an elegant black stainless steel structure with a wood insert and is also available with a bronze vintage PVD cup.

A new addition in the range of cereal presentation is the T collection cubic display. With its elegant and simple design, it has become the preferred choice for boutique hotels and cozy buffet setups. Complete with stand, wooden lid, and wooden serving spoon, it is now an icon of modern elegance on the buffet scene.

Smart W Soup Urns

This 10 Liter capacity of soup urn is equipped with clad bottom, which works on the induction hob with 98% of responsiveness. With the stand, heating methods become even more versatile. Like any of our induction chafers, sterno or electric spring heater (11731-DGT) can be used.

Everlasting hydraulic hinge enables the one-hand operation to serve the food while keeping the soup warm and moisture. Modern and fun design of Smart W ranges has been completed with the arrival of soup urn.

Tiger's coffee urns are the perfect choice for serving hot beverages at breakfast, coffee breaks, or in a relaxing spa environment. With a range of sizes, designs, and finishes to choose from, there's a coffee urn to suit any setting. Made from high-quality 18/10 stainless steel, these urns are durable and built to last. Plus, with the optional electric heater, you can keep your coffee at the perfect temperature without worrying about burning or scorching. The insulated lid ensures that your coffee stays warm for longer, while the solid stainless steel faucet guarantees a clean and easy pour every time. Choose from the classic and elegant Euri and Odin ranges, featuring solid legs and available in 12 and 19-litre sizes. Or, opt for the modern and simple design of the T collection, Natural, and Domino ranges, which are perfect for any contemporary setting. Whether you're serving coffee to guests or customers, Tiger's coffee urns are the best choice. And with easy cleaning and maintenance, these urns are a smart investment for any establishment. So why settle for less when you can have the best? Choose Tiger coffee urns for exceptional quality and style.

T-Collection Dispensers

Classic & Reliable

Tiger has introduced several innovative ranges of juice dispensers. The classic ranges feature a high-grade BPA-free polycarbonate jar (3.8 or 7 L) with a removable stainless steel ice core. A flared interior ridge strengthens the jar, and the drip tray is removable for easy cleaning. Replacement parts are also available, ensuring the dispenser is fully repairable.

Premium Faucet & Easy Care

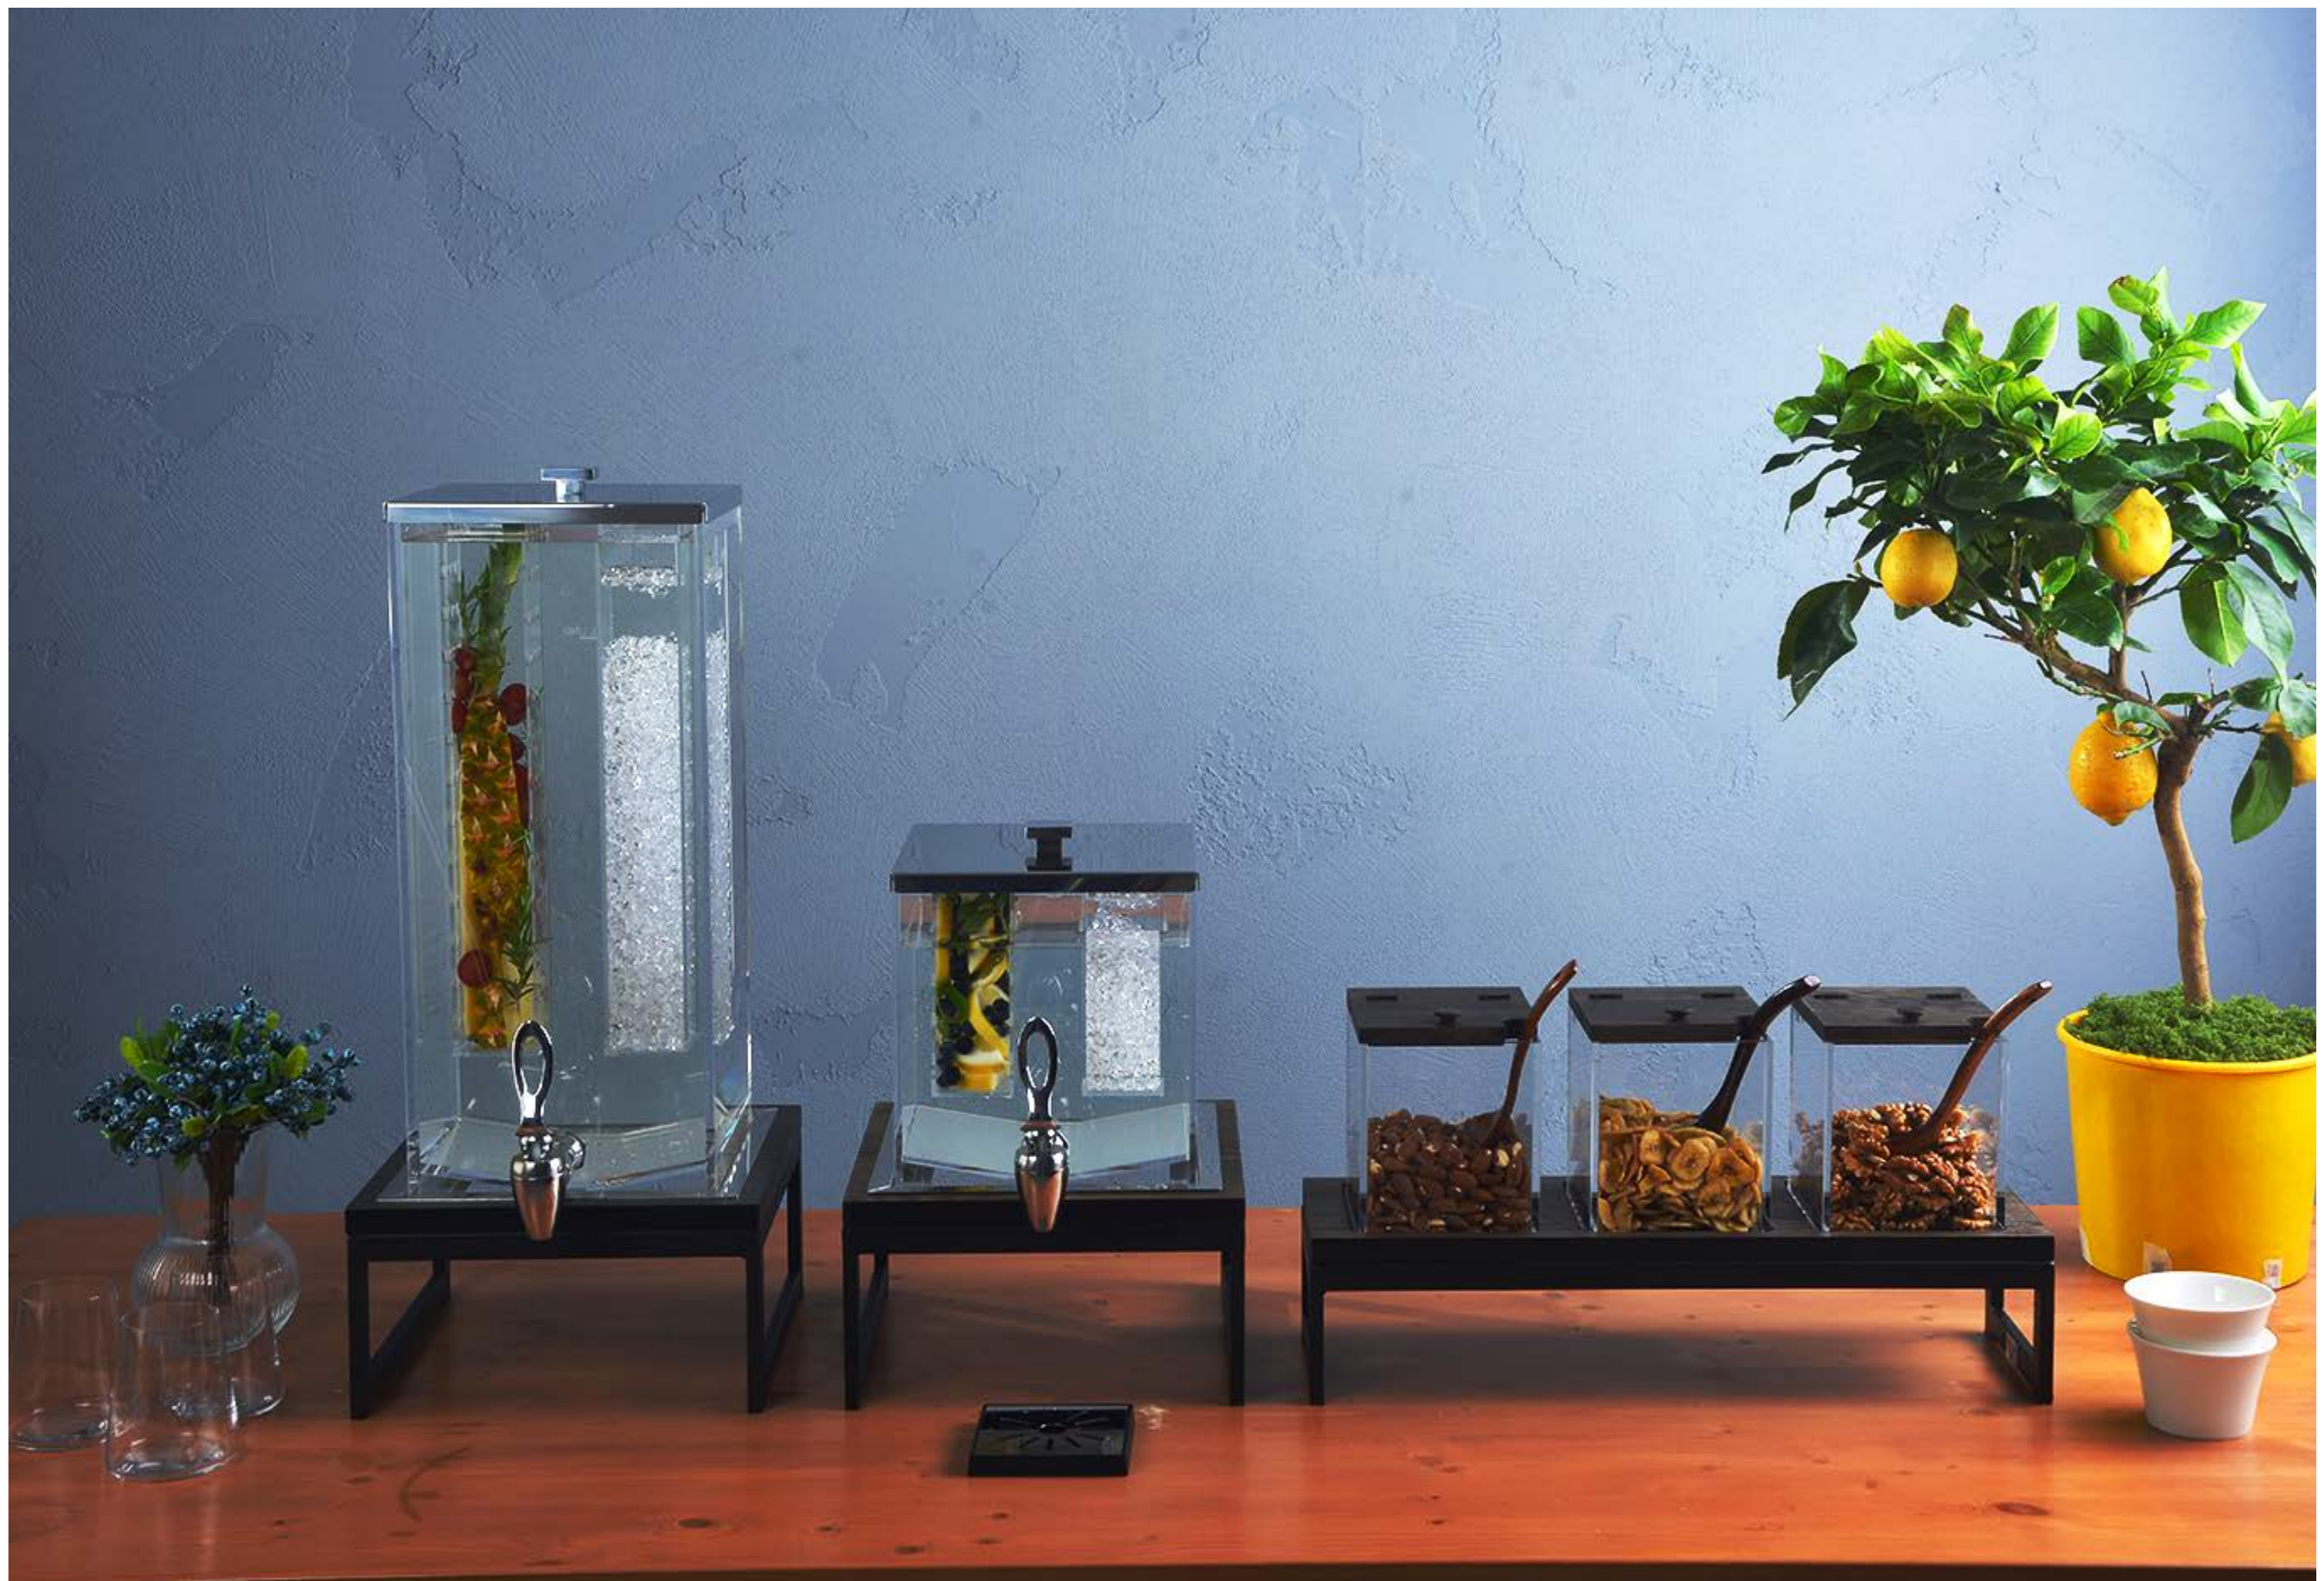

All Tiger juice dispensers are equipped with a solid stainless steel faucet that is easy to clean and built to last. Every unit is fully repairable, making it a reliable investment for long-term professional use.

Modern Elegance – T-Collection

The new T-Collection dispensers feature a cubic BPA-free polycarbonate container with 7 or 15 L capacity. They can be equipped with an ice trap or an infuser for enhanced functionality. The lid is crafted from mirror-polished stainless steel, while the stand—matching the T-Collection mood—combines powder-coated stainless steel with wood.

In addition to the cubic dispensers, a 7 L single glass container version is also available, offered in single or double format with black metal and wood T-Collection stands.
